

Fort William - Port Arthur Ontario

HI! FELLAS HPE UR READY FER THE NEXT MEETING

WEDNESDAY - SEPTEMBER 19TH, 1951 - SEVEN 7:00 pm

RCAF BUILDING - FORT WILLIAM

We have been fortunate in securing the use of the above mentioned premises for our regular monthly meeting but we have to adjourn by 9:30 at the latest. In view of this we are calling the first meeting of the season for 7 pm and will get an expression of opinion from Club members as to whether or not the time suits them.

Frank Start - VE3AJ, Vice President, has been carrying on since the departure of Sgt. Jim Paterson - VE3AZL for Winnipeg and has suggested that some discussion should take place at this coming meeting as to the appointment and election of a President.

Say, I almost forgot. We still have a pair of 807's donated previously by Jim Paterson - VE3AZL and these will be given as a door prize at the Wednesday meeting.

Activities on the ham bands have been somewhat limited - especially with ten and twenty at a low ebb. But now that the grass won't have to be cut and the gardens are just about finished, the only big job left before winter sets in, is the storm windows. We should see a little more activity in the form of local QSO's even if the DX isn't rolling in.

By the way, we have two dandy RCAF films for the meeting - Northwest By Air and Heroes of the Atlantic. Hope to see you there. It would be encouraging to see our fall meetings get off to a good start with a large turnout.

73's B C'ING U WED.

Our new membership pins have arrived and are available to all members of the Club. The Club Membership Fee is \$2.00 and the cost of the pin is \$1.00 extra with membership.

We hope all you fellows who haven't renewed your membership for this year will do so at the next meeting as we intend to revise our mailing list and in the future, only members will receive notification of the meetings by mail.

If enough interest is shown at this forthcoming meeting, we intend to commence code classes for those anxious to get up enough speed to get their ticket.

At a meeting of the Executive of your Club held on Wednesday, September 12th, a discussion took place as to some project for the coming season. It was suggested that possibly we should endeavour to increase interest in Six Metre operation. As a start in this direction, Bill Roberts - VE3ARN will give a demonstration of a Six Metre job he has built up. If any of you fellows have some ideas on Six Metre operation - rigs, converters, antennas, come along and let us have them next Wednesday.
