

LAKEHEAD AMATEUR RADIO CLUB

May, 1952

MONTHLY BULLETIN

---

The next regular meeting of the Club will be held in the RCAF building Fort William, Wednesday, May 28th, at 8 pm.

Programme for discussion will be:

Completion of plans for the Field Day in June. We hope all who will be able to take part will be present. There is still a shortage of equipment especially battery operated receivers.

At the meeting one of the transmitters to be used on Field Day will be on exhibition. It is hoped that we can arrange a demonstration also.

Harry Stephens - VE3AIT and Bill Roberts - VE3ARN are doing a lot of crystal gazing into their TV sets - they report good results at intervals (long ones). So far (we have to take their word for it) the pictures never seem to appear when visitors are present.

Bring along some ideas to the Wednesday meeting for the final meeting of the season in June.

Ben Burrell - VE3BMT has acquired one of the Heath Company's VTVM sets and we hope to have him demonstrate same at the next meeting.

ON THE BANDS - by Bert Tamblin - VE3ANP

conditions on twenty and ten have improved somewhat, especially for short skip. The ten metre band has been open at noon hour and the twenty metre band in the evenings until as late as midnight (and later - for night-owls).

Some DX with Europe and Australia has been heard.

Joe Stevens - VE3XT has a new twenty metre wide spaced beam up and doing fine.

Hec Wilson - VE3DMZ had all antennas collapse during the last bad wind storm.

Pat O'Shea - VE3FW has also been heard but comparatively speaking, the Lakehead activity has been very quiet. Your reporter has been inactive due to summer conditions.

73 fer nw - cu on Wed, May 28th, 8 pm.
