

LAKEHEAD AMATEUR RADIO CLUB

October, 1952

Monthly Bulletin

---

The first meeting of the season was not too well attended. Among the absentees were some who have been regular attenders in the past. We would like to see bigger and better turn-outs. If you have a "beef" or a suggestion, come along and let everyone hear it. The Club is what the members make it. Our next meeting is at the RCAF building on Wednesday, October 29th, at 8 pm.

The big event of the evening will be an Auction Sale of surplus equipment. Bring along all that unused gear and swap or sell it.

We are going to have another dinner meeting soon but we must have your opinion as to when and where.

There is a lack of local activity around the Lakehead and we think it should be pepped up. Why can't we all get on the air two or three nights a week or make an attempt to get on at least one night. Let's draw up a schedule at the next meeting. A schedule would ensure that someone would be on each night for tests or rag chew. We hear complaints about west bound traffic getting stalled at the Lakehead. Let's have more activity around here. None of us are that busy that we can't pass along a message or give it to someone who can.

Most of us have friends who are interested in Ham Radio. We all have them around the shack. Why not, if and when you show up at a meeting, bring them along. Sort of stimulate their interest, as it were.

Al Fulton - VE3AKI reports much activity on 40. One CQ and he is swamped with replies.

Ted Dunderdale - VE3BBO is active on 10.

Ralph Parker - VE3HU says he is still rebuilding and will be on the air in about two years. Probably be in time for a re-opening of 10 Metres.

Bob Christie - VE3DQI at the Soo - active on 40. Would like to contact the Lakehead. Look for him about 7.100 mcs.

Harry Stephens - VE3AIT didn't meet his deadline of October 15, but we expect to hear the "voice of McIntyre" soon.

JCB - a little code practice, brother, and we could use the prefix VE to this call.
