

Lakehead Amateur Radio Club

Port Arthur

June 1959

Fort William

The next meeting of the Amateur Radio Club will be held on Thursday, June 18th at the Civil Defence Building, Fort William. This will be the last until the Fall Season rolls around.

The chief topic for discussion will be the coming Field Day. Usually details for this outing have been completed by this time, but this year we are all packed up with no place to go. That is at the present moment. We hope some brilliant member will come forth and tell us he has the ideal spot all picked out. It had been intended to make use of the park about three miles west of Kakabeka, where we have had two previous sessions, but this is not now available for overnight camping. This has been checked with Highways Department. All those who intend to take part in this outdoor QRM session should be on hand next Thursday.

We expect this will be a short meeting and we can retire to the "shack", work a little DX and have a rag-chew over coffee and....

LOCAL QRM

VE3FW - Pat O'Shea has gone east. He departed last Monday and will be located at Hamilton for a while. Look for Pat on 20.

VE3DGZ - JC Bailey hasn't been heard lately. It is possible he was doing the high wire act on his 10 metre beam and someone removed the ladder.

VE3DPJ - Peter Boyle has forsaken the radio shack for a three day fishing trip. We hope he finds time for fishing and doesn't let too many big ones get away.

VE3ANP - Bert Tamblin has been hospitalized for a few days. Hope you are soon back on the active list Bert.

VE3BPZ - Choppy Walsh has a sad story to tell re cubical quads. We don't blame him for taking up fishing. Choppy is going mobile again.

VE3ASL - Bob Adams is one of the few, if not the only active mobile heard locally. Gets out well on 20 and 75 but still making modifications.

VE3DJD - Herman Dalman is tuning up a two element vertical beam. Has plans for super-duper doubler which is minus TVI. Have the dope ready for publication soon Herman.

VE3AJ - Frank Start has acquired a new VFO. There is some possibility you might hear that call before Field Day.

VE3DBI - Harold Dow is active on 10 and 20.

VE3DMZ - Hec Wilson Big changes under way at this QTH. Must be going to build a super shack. See you on Field Day Hec.

Don't forget - next Thursday - there's a meeting.
