

CANADIAN LAKEHEAD WIRELESS EXPERIMENTERS

Meeting, September 15th, 1937

Members met for a general meeting to discuss the diagram Mr. MacDonald brought up the topic of the 20 Metre transmitter.

The possibility of getting parts was discussed and it was decided that the necessary parts could be collected through donations from club members.

It was also decided to form committees for various phases of the work, thus giving every member a chance to work on the apparatus.

The meeting then adjourned to meet next Wednesday September 22nd for further discussion.
