

Monthly Bulletin

Lakehead Amateur Radio Club

The time has come for all good hams to put away their lawn-mowers and golf clubs, crank up the kilowatts, dust off the mic's of oil up the "bugs". We shall gather together at the old stand--the RCAF building, Fort William at 8 pm, Sept. 24th to commence our winter programme of ragchewing and general QRM.

Since the final wind-up of activities at the Field Day June 21st and 22nd, we are sorry to have to report the loss of some of our good members. Our good friend and worthy Secretary Ernie Reid - VE3BIX has departed to the greener fields of southern Ontario. We were all sorry to see him go but wish him the best of luck in St. Thomas. The Executive have chosen as Ernie's successor, that enthusiastic lightning dodger from Central Avenue, Hec Wilson - VE3DMZ. Long may you push a pen, Hec.

The appointment of DMZ to Secretary-Treasurer left a vacancy on the Executive and in order to start off the season at full strength, the Executive have chosen Al Fulton - VE3AKI as a director. Al was next in line for this position at the last elections.

Also missing from the Roll Call this fall will be Bob Christie - VE3DQI who has moved to the Soo and Gilbert Ward and son who departed for the U. S. A.

XXXXXXXXXXXXX

The Field Day and a few words on same. We regret to have to report that it was not a very successful affair, judging from the angle of points gained in the Contest but it was a good outing, enjoyed by all who participated and we have gained valuable experience for next year. Those who took part will fully appreciate that a successful Field Day requires preparedness before the Day and real Team work on the Day. We might add a prime requisite for the individual is persistence as demonstrated by Bill Roberts - VE3ARN and his soldering iron and the vocal efforts of Bob McNiell. For a successful Field Day equipment must be fully prepared and tested before being transported to location, no last minute lash-ups must be permitted. Our lack of simple battery operated receivers was evident. There should be some on hand, if not for Field Day, then for emergency use. In the future we can probably be assured of 110 Volt supply and this will lead to much greater possibilities in the transmitter set up. It would add to the fun if there were more mobile equipped cars on our next Field Day and it looks as if there will be more around the Lakehead in the near future. C U at the next Field Day. AJ.

A hearty vote of thanks is extended to George Taylor - VE3BNJ for his Taylor made meals.

VE3AIT is in the process of re-building his final and will be on the air Oct. 15. We shall see.

VE3BPZ has a new tower in the air and will soon be reaching out for bigger and better DX despite the Gardens.

VE3BBO has, from all accounts, enough gear to put a transmitter on each band. Active on 40 when time permits.

VE3ARN ham activities somewhat neglected. Too busy putting in oil burners while waiting for TV signals. He threatens to go mobile anytime now.

VE3DMZ will soon be on the air on all bands, with a Viking and a 10/20 metre beam array, also all bands mobile.

VE3DQI has departed to the Soo. He is kept busy shooting trouble during the day and walking the floor at night with a new junior op. Any time for ham radio, Bob?

VE3BMT reports not much ham activity--is actually going in for high-fidelity--which is next door to joining the bcl's.

VE3XT has been sticking his chest out all summer and has full reason to do so. Twin daughters and a very fine 20 metre rotary.

VE3HU should be on shortly, as the grapevine has it, he was picking up some good equipment in Duluth.

VE3DPF will be on all bands by the end of the week.

The list of amateurs, with call signs and addresses which accompanies this Bulletin will prove to be interesting and useful, our thanks to the local D. Of T. Staff.
